Virginia Author Launches Speculative Suspense Series with Debut Novel

Senders: Discovery, the first novel in the four-book *Senders* series by Ever James, explores telepathy, memory, and what happens when the thoughts inside your mind may not be your own.

FRANKLIN COUNTY, Va., Sept. 1, 2026 – Franklin County author Ever James will release *Senders: Discovery*, her debut novel and the first book in the four-part *Senders* series, on Sept. 26, 2026.

A character-driven work of speculative suspense, *Senders: Discovery* introduces a world in which telepathy is beginning to emerge, and some people can transmit thoughts, emotions, memories, and physical sensations into the minds of others.

Set primarily in Washington, D.C., *Senders* follows Sara Miller, a young woman unaware of her connection to a hidden society of telepaths, and Alex Moretti, a member of one of the founding Sender families. Their meeting exposes secrets that have shaped both their lives and raises a disturbing question: How can you trust your own mind when some of the thoughts inside it may not belong to you?

“Stories about telepathy often begin in the middle, after the abilities and the organizations built around them are already well established,” James said. “I wanted to begin earlier, with people discovering that the human mind may be changing and trying to understand what that means for the rest of us.”

Rather than presenting telepathy as a distant superpower, *Senders: Discovery* examines how such an ability might first emerge and how quickly it could be used to influence relationships, personal identity, institutions, and the truth itself.

The novel begins a four-book series that will follow the growth of the Senders and the consequences of their increasing influence. Each installment will move the story to a different international setting as its characters confront the opportunities and dangers created by an evolving human consciousness.

Senders: Discovery will be published by Haven Editions and released in paperback and ebook formats. An audiobook edition is forthcoming.
